

The Future of AARC

April 27, 2017

Calgary, Alberta

As Alberta recovers from its three year economic recession, a group of AARC stakeholders including senior management, the board of directors, donors, alumni parents and graduates spent two days developing a new Strategic Plan for AARC.

The purpose of the Session was to develop a framework for successful operations of AARC for the foreseeable future and specifically the next five years. While much work remains ahead, this broad and deep stakeholder group established achievable goals for long term funding and expansion of AARC's client base, while reaffirming their commitment to AARC's unique and successful clinical treatment model.

With an outstanding track record celebrating 586 graduate families over the past twenty five years, AARC looks forward to greeting and seeing many supporters at its annual Gala to be held in Calgary on May 17th.
